28/09/2015 11:21	With the lengthh of time it usually takes to have an appointment to sese your appropriate doctor , i really see no sence in having a particular practioner.
25/09/2015 04:08	We have not been patients at the Bridport Medical Centre log enough to make a judgement it is so big compared to our recent village surgery with its own pharmacy . Difficult comparison .
25/09/2015 09:00	Its so hard to get an appointment with your doctor . My Dr Napper is a fabulous Dr with a personable , friendly & kind approach & traets all of her patients as individuals. Another thing is that the paper work takes a long time to go though the system, i was discharged by a hospital & they sent my discharge letter to the surgery, but 3 weeks later, there was nothing on my record of bmy new diagnosis or hospitalization this was particular challanging when i needed some more medication

25/09/2015 09:11	Most ridiculous survey i've every seen !!! This isn't Amazon you are either a patient or you aren't , whats the point of recommendation , if it's urgent they either attend the hospital or here , one would hardly " recommend " a medical centre to someone needed an urgent appointment they don't have a choice . Also if you recommend a particular GP you won't get an appointment for at least 15 days .
22/09/2015 10:27	Because when my daughter in law who was visiting in the summer needed some tablets she had left at home , she was told she could not see a doctor , she was told to contact her own doctor who would fax a percription though. Her practice said it was this practice who should contact her doctor ! Result - no tablets , negative result not good .

22/09/2015 09:46	Only want a yellow fever jab , has taken 5 phone calls and when i got appointment its always late.
